

Jetstream Waterblaster Rentals

We've got you covered

Easy to use, easy to convert and now easy to rent
 Maybe you have a short-term or seasonal contract that just doesn't justify the purchase of a waterblaster. No problem. We've got you covered. Our FS Solutions centers in Ohio and California are the first of several planned full-service Jetstream rental outlets.

Choose from 170- to 300-horsepower units. Jetstream rentals come with all the advantages you associate with the Jetstream name—ease of use, ease of maintenance and the ability to convert from 10K to 20K and 40K PSI pressures.

You can pick up the unit/s you need, or FS Solutions can deliver right to your jobsite. We also stock parts and accessories, and provide same day nozzle drilling. Even more important, we offer our customers waterblasting safety training with every rental.

Renting lets you “try before you buy,” and our rent-to-own program allows you to apply a portion of the rental fees to your down payment.

Whether you simply rent or rent to own, our highly trained staff will go over each rental with you, taking you through the ins and outs of operation, and making sure you understand safe practices.

Training for you, too

We also offer intensive training classes to help customers develop a better understanding of pressure versus flow, review the math and science needed to calculate line run pressure drops and find the best nozzles for different materials and applications.

X3600 Series	170 HP	Pressure (psi)	6,000	7,500	10,000	12,500	15,000	20,000	30,000	40,000

FS SOLUTIONS
SALES • RENTALS • PARTS • SERVICE

From the people who bring you Guzzler, Jetstream and Vactor, the brands you know and trust, we bring you FS Solutions. With nearly 100 years of collective experience in industrial vacuum loading, sewer and catch basin cleaning, vacuum excavation and industrial high-pressure waterblasting, FS Solutions provides unsurpassed expertise and a unique breadth of offerings to meet the needs of industrial cleaning contractors and other industry professionals.

Staffed with skilled, factory-trained technicians, FS Solutions centers provide:

- **High-performance parts** for most makes and models of industrial vacuum loaders and waterblasters
- **Accessories** to meet a variety of industrial cleaning operations
- **Repairing and rebuilding** of equipment, pumps, blowers and more
- Large selection of **used and refurbished vacuum trucks**
- **Waterblaster rentals** complete with waterblast safety training
- **Blower Repair** on most makes and models from the top manufacturers
- Authorized repair and service for **StoneAge® brand** waterblasting & sewer cleaning tools, parts, and accessories

Repair, recycle, refurbish We've got you covered

New life for used equipment

Before you invest in a brand new vacuum truck, sewer cleaner or waterblaster, consider checking in with FS Solutions. We've got you covered.

We'll help you:

- Repair or refurbish damaged components
- Recycle salvageable parts
- Revitalize with a new paint job
- Run preventive or responsive diagnostics on your equipment to determine what needs to be done to keep it in good working order—and get it back on the job

The best part is that, when you take your equipment to an FS Solutions center, you'll have peace of mind knowing that your equipment is being serviced by our factory-trained technicians.

Cracked impeller? Broken bearing carriers or cartridges? Damaged gear hubs? Worn bearing carriers? Need to replace the entire worn-out vacuum module? Whatever the complexity of the repair, from pump-related mechanical problems to replacing worn parts, we've got you covered.

Premium Used Equipment We've got you covered

Like-new performance without the price tag

Who doesn't want a shiny new truck? But sometimes it's not in the budget. We've got you covered.

Collectively, FS Solutions locations in Alabama, California, Illinois, Louisiana and Texas provide one of the widest selections of used environmental cleaning equipment in the United States—and in a wide range of makes and models.

But we don't just take these trucks in one garage door and drive them out to you through the other. We put our FS Solutions Equipment mechanics to work to give you a choice of:

- Class A machines, fully restored and offered with a six-month warranty
- Class B machines that are put through a 100-point check
- For those on a tighter budget, Class C machines with functional working components

We also offer free appraisals for trade values, refinancing, repair and wreck estimates.

The Parts You Need We've got you covered

Thousands of Parts in Inventory

As they say, time is money. And when you're down, waiting for a part, you're losing money. That's why FS Solutions centers stock thousands of critical service parts for vacuum trucks, waterblasters and sewer cleaners. Parts are available for pickup or quick shipment.

On-line Store for 24/7 Shopping

The new FS Solutions online store helps make the ordering process fast and convenient, including immediate access to fast search capabilities to locate and buy tens of thousands of high performance parts and accessories for the Guzzler brand – as well as other makes and models of industrial vacuum loaders – and the Vactor HXX and other brands of vacuum excavators. The online store also allows customers to purchase directly from assembly drawings to identify exact needs and perform fingertip zooming and scanning to make navigating diagrams simple.

NEW STONEAGE Repair & Service

To better serve industrial cleaning contractors, plant customers and other industry professionals FS Solutions centers in Toledo, Ohio and Long Beach, Calif., are now authorized repair and service centers for StoneAge brand waterblasting and sewer cleaning tools, parts and accessories. Having authorized repair locations minimizes shipping costs and time for everyone.
